

QUALITY POLICY

Wrexham Wire specialises in the manufacture of plain, phosphate and stearate drawn mild steel, carbon steel and alloy steel wire in the direct drawn or inter-annealed conditions in diameters up to 22mm, along with electro-plated galvanized wires up to 4.00mm and polymer coated wires.

We distribute to automotive, construction, white goods, furniture and other industries.

Our company objective is to constantly exceed expectations from all interested parties in every aspect of product and/or service.

This requires:

- total management commitment
- the involvement of all employees
- working closely with our interested parties
- objectives, standards and systems based upon a commitment to Total quality and continual improvement

It is achieved by:

- conforming to requirements
- risk-based thinking
- getting it “right first time, every time”
- striving for zero defects
- training and teamwork
- performance evaluation of people and processes

Total quality is a permanent feature of the company’s life.

It is planned, implemented, nurtured and maintained by a robust Quality improvement programme.
